SECURELUX OVERVIEW

ABOUT US

With over 40 years of experience in providing security screens, windows and doors to homes in Queensland's growing South East, we have the knowledge and expertise to offer you a variety of security solutions to suit your home, budget & security requirements.

Securelux is a family-owned and operated business committed to providing quality and reliable security solutions for our clients.

At Securelux we don't believe in a one-size-fits-all approach. We understand that security is personal; all clients have different needs, requirements and budgets, which is why our experienced and highly professional team are trained to provide personalised services and tailored solutions.

Our years of experience also allows us to provide unique, custom security solutions where others cannot.

WHY CHOOSE SECURELUX

3M Security Film sits on top of your glass windows and provides maximum security by protecting glass panels from being broken. 3M Security

Film is made using multiple, micro-thin layers, making your windows incredibly strong. 3M™ High Mass Clear Adhesives hold the glass together upon impact. We

can also retrofit applications of 3M to existing annealed glass to Australian Safety Glazing Standards. 3M offers Residential Home owners a lifetime warranty¹.

- Designed for single and multi-panel windows
- Secured with Crimsafe Screw-Clamp™ technology for ultimate protection

All window screens are installed by our highly-trained team.

COMPLETE PROTECTION IN EVERY SEASON

Insects

Stop them in their tracks - With Crimsafe you can still enjoy the breeze through your home without the uninvited guests!

With the changing seasons comes a host of bugs and insects including mosquitoes, beetles, cockroaches, spiders and more. They move into our homes to get out of the heat, get out of the cold, and to find food and water. Australia has more than 500 species of insects and we understand when you don't want them in your home.

Crimsafe is well known for its security level but there are additional advantages including minimised insects as the mesh on Crimsafe security screens are so tight that mosquitoes can't get through. If you're ready to help protect your home from insects, contact our friendly team today.

Storms

Along with keeping out intruders, did you know that Crimsafe screens and 3M film can protect your home's glass panels in the event of a storm or an unseasonal weather event?

- Crimsafe Security Screens - it's important to choose security screens on your property that provide a level of protection against flying debris, while still being able to listen to the rain or enjoy the breeze.
- 3M Film - If your home is damaged by a storm or natural disaster, this adhesive film on your glass panels will provide protection from flying glass fragments.

If you don't already have security screens, or are thinking about upgrading, Crimsafe's security screen doors and windows help to provide a barrier from hail and other objects being blown around in the wind. If you live in an area that is of risk of flying debris during a storm, these security screens could save your windows from damage.

Bushfire

With bushfires becoming more prevalent in Australia, it is no wonder that fire safety is a big consideration for homeowners who are looking at ways they can protect their home should a fire come close. Consider the dual benefits of Crimsafe Security Screens for Bushfire Protection:

Floating Ember Protection

Radiant Heat Reduction

Falling Debris Protection

Internal Spot Fire Risk Reduction

SECURE YOUR MOST IMPORTANT ASSETS

Your family

Your pets

Your home!

Remember!

- Don't be a statistic and leave your safety to chance.
- Poor product quality or installation methods can create weakness in your home security leaving you vulnerable.

i These images are not Securelux products or installations. Our team will frequently attend homes who have experienced a break in and install a solution to enhance security and provide peace of mind to the owner.

WHAT SERVICES DO WE OFFER?

Consultation

Our Solution Consultants are the best in the business. They listen to your all requirements and preferences and match them to the best possible security solution for your home.

Manufacturing

We manufacture locally to ensure we can provide high-quality customised solutions in the shortest possible time frames. Our factory team is passionate about what they do and understand that every factory process they undertake is ultimately providing protection for your valuables and loved ones.

Measuring

The measuring process is one which other competitors in the industry either forgo or expedite. In contrast, we do not compromise on accuracy and quality which is why we have a 'Check Measure' stage. Once a quote is accepted we do a second measure to ensure accuracy prior to manufacturing

Ask us about our referral program!

Installation

We may be biased, but our installers have set the bar so high when it comes to quality, the majority of our competitors struggle to match. We are rated so highly on search engines and social media because our team will not compromise your home having the most secure and aesthetically pleasing solution.

Testimonials

We have recently had security installed by Securelux. It was a seamless experience from quote to installation. We would recommend this company to everyone. Great job!

 Cheryl

The Securelux Team were all very professional, friendly and happy to answer any questions. A very professional installation, very happy with the result :)

 Belinda

I'm very happy with the finished product. My initial enquiry was responded to very promptly and Installation was performed ahead of the initial estimated time frame. I would have no hesitation in recommending Securelux.
